CITY ENGINEERS' VAULT
INDEX
TO CITY ENGINEERS' MAPS & PLANS

After 1786 – 1997 & undated.

This index to City Engineers' maps and plans in the Engineers' vault is based on indexing methods used in the City Engineers' office including index cards and itemized lists of maps & plans. Over 6,000 entries are included with cross-references.

Individual entries are listed by location such as street or neighborhood or by use. Each entry includes location, date or n.d. (no date), description, letter and number of drawer, box, pigeon hole or file cabinet.

Descriptions may include footprints (outlines of buildings), names on property, scale, engineer, condition (fragile, brittle, etc.), various numbers found on the maps & plans, and type (blueprint, paper, vellum, etc.). In addition to individual entries, major entries include BRIDGES, BUSINESSES, CEMETERIES, CHURCHES, DRAINAGE, ENGINE HOUSES, HARBOR, LANDINGS, MARSHLANDS, MILLS, RESERVOIRS, SEAWALLS, SCHOOLS, SEWERS, URBAN RENEWAL, UTILITIES, WATER SUPPLY, WATERFRONT, WHARVES, WOODLOTS, etc.

Although the dates of the maps and plans range from after 1786 to 1997, the majority date from the 1800s. Additional maps & plans are located in the City Engineers' office.

The maps & plans are on paper, paper on canvas, vellum or linen. Many on paper or paper on canvas are duplicated on linens. Always use the linen copy in preference to the paper or paper on canvas copy that is often brittle and in fragile condition.

Additional maps & plans can be found listed in *Gloucester, Massachusetts Town & City Records Guide* Vol. I.
